COSMOSTAR PNEUMATIC DIAPHRAGM PUMPS

Supply or transfer with ease!
Cosmostar diaphragm pumps are ideal for bulk transfer of your solvent or water-based, low to medium viscosity inks and ingredients. They offer easy maintenance with an extremely reliable air valve for true non-sticking operation.

Why Diaphragm Pumps?
Sealless Design - Explosion-Proof - Low Material Shear - Ease of Maintenance - Can be Run Dry Without Damage - Portable - Self Priming and Easy-to-Appl

Cosmostar air operated diaphragm pumps are being used widely in all fields and industries and have many specific characteristic not available to conventional pumps. **Cosmostar** pumps are manufactured to high engineering and quality standards with many market leading ideas and technology, its designed to give highly competitive performance as well as high reliability.

Diaphragm pump specification

Model	Pump Size	Max. Flow Rate	Max discharge pressure	Fluid Ports inlet and outlet	Materials of construction
HE-0302	3/8"	23 LPM (6.0 GPM)	8 BAR (120PSI)	3/8"	Aluminum
CY-0902	3/8"	23 LPM (6.0 GPM)	8 BAR (120PSI)	3/8"	Stainless steel Aluminum
CY-0903	3/4"	120 LPM (31.6 GPM)	8 BAR (120PSI)	3/4"	Aluminum
HE-0303	3/4"	100 LPM (26.3 GPM)	8 BAR (120PSI)	3/4"	Stainless steel
CY-0906	1"	175 LPM (46.0 GPM)	8 BAR (120PSI)	1"	Stainless steel Aluminum
HE-0306	1"	133 LPM (35.0 GPM)	8 BAR (120PSI)	1"	Stainless steel
HE-0307	1-1/2"	400 LPM (105 GPM)	8 BAR (120PSI)	1-1/2"	Stainless steel
CY-0908	2"	620 LPM (163 GPM)	8 BAR (120PSI)	2"	Aluminum
